INTERNSHIP & TRAINING

Credent Infotech Solutions

Machine Learning Intern June 2024 – Present | Gurugram, India

- Developed and implemented a robust face recognition system using deep learning techniques.
- Conducted extensive testing and optimization to improve model performance and reduce false positives/negatives.
- Working on Computer Vision, Deep Learning, SQL Database, Django.

Maruti Suzuki India Limited

Data Analyst Intern June 2023 – July 2023 | Gurugram, India

- Analyzed a dataset of the previous financial year to uncover patterns and insights related to call management.
- Utilized tools such as Microsoft Excel and Python (NumPy, Pandas, Matplotlib, Seaborn) to perform in-depth analysis.
- Contributed to strategic decision-making by providing actionable insights for optimizing call management processes.

IBM SkillsBuild

Machine Learning Intern June 2023 – July 2023 | Gurugram, India

- Contributed to the development of the Mental Fitness Tracker model to predict the mental health status of individuals across global populations.
- Utilized Python programming language and Scikit-learn library to implement machine learning algorithms including Linear Regression, Decision Trees, Support Vector Machines (SVM), and Random Forests.
- Collaborated with a multidisciplinary team throughout the model development lifecycle, including data preprocessing, feature selection, model training, evaluation, and validation.

Skills

ML Skills: Predictive Modelling | Statistical Analysis | Exploratory Data Analysis | Deep Learning
Packages: Scikit-Learn | TensorFlow | Keras | NumPy | Pandas | Matplotlib | NLTK | BeautifulSoup |OpenCV
Programming Languages: Python | Java | C | SQL | HTML | CSS
FRAMEWORK: Django | Flask
DATABASE: MySQL | MongoDB
Concepts: MLOps | Data Structures and Algorithm | Objected Oriented Programming
Professional Tools: Visual Studio | Jupyter Notebook | Google Collab

Education

B.Tech. CSE(Artificial Intelligence and Machine Learning)

Dronacharya College of Engineering 2025 | Gurugram, Haryana, India

CGPA = 8.1

Senior Secondary (PCM)

M.D. SENIOR SECONDARY SCHOOL 2021 | Gurugram, Haryana, India

Percentage = 77%

Secondary

VIVEKANAND GLOBAL SCHOOL 2019 | Gurugram, Haryana, India

Percentage = 88%

Projects

IntelliTrade - AI-driven Stock Prediction Model

- Mar 2024 – Present
- Tech Used – Python, NLP, LSTM, SVM.
- Developed an AI-driven stock prediction model to forecast future stock prices and determine optimal buy and sell points based on historical stock data and news sentiment analysis.
- The project aimed to assist traders and investors in making informed decisions and enhancing profitability in the stock market.

PlantGuard: AI-Powered Plant Disease Detection and Prediction

- Dec 2023 – Feb 2024
- Tech Used – Python, Sklearn, TensorFlow, CNN, RandomForestRegessor, RandomForestClassifier.
- Led the development of AgriAI, an AI-powered system for plant disease diagnosis, yield estimation, and crop recommendation.
- The project aimed to revolutionize agriculture practices by providing farmers with actionable insights to improve crop health, optimize yield and make informed decisions on crop selection.

Achievements

- 1st position Data Prophet (Hackathon) Organized by IIT BHU, Varanasi.
- 1st position in Innovate and Iterate (Hackathon) organized by IIIT, Sri City, Andhra Pradesh.
- Finalist of Hack to crack National level Hackathon organized by VIMEET, Maharashtra.
- Finalist of Analytic Arena (Hackathon) organized by IIIT, Sri City, Andhra Pradesh.
- 2nd position in Hack-o-relay organized by GDSC–DCE.
- 1st position in Mavericks Dronathon.
